Reasons For Allowance

1. The following is a statement of reasons for the indication of allowable subject matter:

The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest a method for therapeutically treating a patient, comprising a locking member that holds a delivery mechanism in an initial configuration, the locking member resists inadvertent the release of a medical device by the delivery mechanism, where a handle has a first and second independently movable actuator coupled to the delivery mechanism, where the step of moving the first actuator with a first selected amount which causes the outer sheath to move an amount in the proximal direction at a first proportion rate in a precise manner, and causing the outer sheath partially released the medical device, where the step of moving the second actuator which causes the outer sheath to move in the proximal direction at a second greater proportional rate in a rapid manner to fully release the medical device. *As to claim 6*, the prior art does not teach the invention including, inter alia, a method for therapeutically treating a patient comprising a locking member that holds a delivery mechanism in an initial configuration, the locking member resists inadvertent the release of a medical device by the delivery mechanism, where a handle has a first and second independently movable actuator coupled to the delivery mechanism, where the first actuator is a rotatable knob, and the second actuator is a longitudinal slider, where the step of rotating the first actuator with a selected amount, such rotation of the first actuator causes the outer sheath to move an amount in the proximal direction at a first proportional rate in the precise manner and causing the outer sheath to partially release the medical device, and where the step of sliding the second actuator longitudinally which causes the outer sheath to move in
